 Granule 5157820 Associations and Cust./Vend. Linking
 Granule 5157830 G/L Open Entries
 Granule 5157840 Extended Lists and Reports
 Granule 5157850 Ext. Analysis (Trial Balance and VAT)
 Granule 5157860 Payments Base

Further Development and Product Support

The product support for the granules listed above is currently available for all NAV versions, incl. versions 2.XX to NAV 2016.

As of July 1, 2017, new features and functionalities will only be provided for the latest Microsoft NAV version (probably NAV 2017). gbedv will publish 1 or 2 updates with new features and functionalities each year. Bug fixing/troubleshooting will be available for earlier NAV versions as well.

Further information is listed in the following table:

	NAV for 2017	NAV 2016 to NAV 2013 R2	NAV 2013 to NAV 2.XX
Updating SEPA and bank statement import	Currently not specified	Until Dec 31, 2021	If required and/or in connection with an OPplus update
Troubleshooting of critical errors	Currently not specified	Until Dec 31, 2021	If required and/or in connection with an OPplus update
Functional further development	Currently not specified	Until June 30, 2017	Until Dec 31, 2016
Support	According to the current state of knowledge, all NAV versions are fully supported without any restrictions.		
Training and setup support
